Mohammadrasoul Asghari

Enterprise AI Architect & Engineer

I bring AI into the core of large organizations — and I build it myself.

ecosystem

PROFILE

Backend engineer turned AI architect. I bring AI into the ~30 companies of Hamrahtel Group, run the group's AI academy, and ship production AI end to end: telephony-grade voice agents, LangGraph chatbots serving 10,000+ conversations a month, n8n automation and MCP-based agent platforms. Before AI, I spent years building Laravel, PHP and Go systems — and I still contribute to the Laravel framework.

EXPERIENCE

Director, Telsa Academy · Hamrahtel Development Group 2025 — Present

- Built role-based AI curricula for executives, managers and staff across the group
- Run hands-on labs and an internal AI-champions network to move teams from pilots to daily use
- Report AI adoption and impact to group management

Enterprise AI Architect · Hamrahtel Group (~30 companies incl. GSM, GSMP) 2023 — Present

- Delivered a telephony-grade Voice AI agent single-handedly in 3 months — fine-tuning, VoIP/SIP bridging, GPU infrastructure, deployment and operations
- Shipped a LangGraph customer assistant handling 10,000+ conversations per month
- Each flagship project freed thousands of dollars in operating cost
- Ran AI workshops for executives of Hamrahtel, GSM and GSMP

Founder · Raavi

2025 — Present

AI meeting memory: Persian transcription, summaries, action items, knowledge graphs and MCP hosting.

CORE SKILLS

AI & Agents

LangGraph

LangChain

RAG / LightRAG

MCP servers & hosting

LLM fine-tuning

Speech AI (STT/TTS)

Prompt engineering

OpenAI / Claude / open-source LLMs

EXPERIENCE (CONTINUED)

AI Solutions Architect & Instructor · 7Learn Academy 2023 — Present

- Author and instructor of the n8n Expert course — one of 7Learn's most popular
- Designed AI features and contributed to the learning platform's Laravel codebase (17 merged PRs)
- 5,000+ learners trained across courses and bootcamps

AI Automation Consultant · Carbon 2024 — 2025

Workflow automation and team-productivity systems with LLMs and n8n.

Senior Software Engineer · Planet 2022 — 2023

CRM, HR, support desk and LMS modules with Laravel, Go, React and Next.js.

Chief Technology Officer · Dehyar.net 2021 — 2022

- Owned engineering end to end: architecture, backend, front end and infrastructure
- Built and managed the development team (PHP/Laravel, React)

Backend Developer · Farabi Brokerage 2021

Server-side and backend development — where the journey started.

SELECTED WORK

Telephony-grade Voice AI agent — from zero to production in 3 months

Owned the whole program as the engineer in charge and supervising contractor: model fine-tuning, bridging the phone network and the internet over VoIP/SIP, GPU provisioning, deployment, updates and day-to-day operations — delivered single-handedly.

Speech AI · LLM fine-tuning · VoIP / SIP · GPU infra · Python

LangGraph customer assistant serving 10,000+ conversations a month

Designed a multi-step agent with retrieval over company knowledge, tool calls into internal systems and human hand-off — built for reliability and measurable deflection rather than demos.

Python · LangGraph · RAG · Vector DB

Raavi — the intelligent memory of your meetings

Founded and built Raavi: Persian-first meeting transcription, smart summaries, automatic action items and per-company knowledge graphs, plus MCP hosting so teams can plug their own AI agents into it.

Laravel 11 (DDD, multi-tenant) · FastAPI · LightRAG · MCP
